Session 004 — Arcane Collection Dashboard Sprint

Date: June 2, 2026

Start: ~8:30–9:00 PM CDT

End: 4:12 AM CDT

Duration: ~7 hours

Git Commit: 0bc3069 — "Built arcane collection dashboard"

Files Changed: 4 files, 357 insertions(+), 63 deletions(-)

Status: SHIPPED

Primary Objective

Transform the newly-created Arcane module from a placeholder page into a functional collection tracking dashboard backed by Supabase.

Work Completed

1. Supabase Arcane Collection Integration

- Created and finalized useArcanes.js custom React hook
- Connected Arcane module to Supabase collection views
- Implemented parallel queries: arcane_collection_summary, arcane_collection_by_type, arcane_collection_detail
- Resolved schema access and 401 permission errors
- Resolved React hook misuse and duplicate import errors
- Verified live data retrieval from Supabase

2. Collection Statistics Dashboard

- Live summary cards: Total (129), Owned, Completed, Missing
- All values dynamically populated from Supabase

3. Arcane Category Breakdown Cards

- Replaced original table view with category cards
- 9 categories: Amp, Kitgun, Melee, Operator, Primary, Secondary, Tektolyst, Warframe, Zaw
- Each card shows: Total, Owned, Completed, Missing

4. Arcane Catalog

- Full arcane listing (129 records)
- Columns: Name, Type, Owned, Rank, Needed copies, Completion status
- Example: Arcane Energize — Owned: 21 Needed: 0 Rank: R5 Complete

5. Search Functionality

- Real-time filtering with partial name matching
- Case-insensitive search
- Verified: 'Energize', 'Molt'

6. Type Filter Buttons

- All + 9 category filter buttons
- Verified filtering behavior against catalog results

7. Visual Status Indicators

- Complete → Green · Partial → Yellow · Missing → Red
- Completed-row highlighting for scan visibility

Bugs Resolved

- Duplicate import errors
- React hook misuse error
- Blank page rendering issue
- Supabase schema access (401 permission errors)
- Category card rendering issues
- Search filtering logic errors
- JSX closing tag / rendering errors
- Catalog data binding issues

End-of-Session Module State

Arcane module is a fully functional collection viewer and progress tracker:

- Collection Summary Dashboard (live, Supabase-driven)
- Category Breakdown Cards (9 categories)
- Searchable Arcane Catalog (129 records)
- Type Filter Buttons
- Ownership, Rank, and Completion Tracking
- Visual Status Indicators

Next Session Targets

- Priority 1: Clickable category cards
- Priority 2: Expandable arcane detail rows

- Priority 3: Arcane ownership editing (update → save to Supabase → auto-refresh)
- Priority 4: Complete collection management workflow
