Session 005 — Arcane Collection System Completion (Shipment C)

Date: June 2–3, 2026

Start: ~4:13 PM CDT

End: 2:20 AM CDT

Duration: ~10 hours

Git Commit: 0bc3069 + 3 additional commits

Shipment: C — Arcane Collection System

Status: SHIPPED

End State: Total: 129 · Owned: 33 · Completed: 29 · Missing: 96

Primary Objective

Push Shipment C to completion before transitioning to Shipment B (Collection Intelligence).

Work Completed

1. Arcane Catalog Layout Refactor

- Before: single-column list, detail panel at page bottom, excessive scrolling
- After: responsive 4-column tile/card grid, faster navigation, easier visual scanning
- Result: page feels like a collection manager, not a database dump

2. State Persistence Bug — Detail Panel

- Bug: switching category filters left previous arcane detail open
- Fix: selectedArcane state now clears correctly on every filter switch

3. Ownership Save Bug — Supabase Not Updating

- Issue: Save button appeared functional but values were not persisting
- Resolution: ownership updates now persist, summary cards update, counts recalculate
- Verified with: Pax Bolt, Melee Influence, multiple test cases

4. Arcane Tile Visual Polish

- Hover highlighting, selection highlighting (gold border), consistent borders

- Arsenal-style interaction feedback — unified interaction language across Jarvis

5. Collection Progress System

- Each tile shows: owned copies, copies remaining, derived rank, percentage, progress bar
- 21/21 (100%) → Complete (green) · 4/21 (19%) → Partial (yellow) · 0/21 (0%) → Missing (red)

6. Input System Fixes

- Resolved leading zero bug, difficult editing workflow, input validation edge cases

7. Rank Milestone Quick-Entry Buttons (R0–R5)

- R0=0 · R1=3 · R2=6 · R3=10 · R4=15 · R5=21
- Active rank highlighted gold. Manual entry still supported for partial amounts.

8. Arcane Editor — Modal Conversion

- Before: click arcane → scroll down → edit at bottom of page
- After: click arcane → modal opens immediately → edit in place
- Darkened overlay, centered display, close button, click-outside-to-dismiss
- Modal styling matches Arsenal and Archon Shards — unified visual language

9. Modal Layout Refinement

- Header sizing, stat card spacing, button spacing, progress visibility, information density

Patrick independently located and modified title sizing, navigated component hierarchy, and fixed multiple UI issues without assistance.

Additional Commits This Session

- a55c7db — Fixed color mismatch on arsenal overlay
- 810cd91 — Migrated cultivation codex to manuscript theme; physique constitution system
- 43d4afb — Arcane codex seeding, cultivation themes, arcane setup copy system

Architecture Decision

“It’s easier to change from Halloween decorations to Thanksgiving decorations after you have the keys to the room.” — Patrick Onuoha Jr.

Arcane data cleanup deferred. Infrastructure ships first. Supabase cleanup follows once the room is built.

Screenshot Timeline (~10-hour arc)

- 4:36 PM — List layout; state persistence bug visible
- 4:36 PM — Grid layout lands, 4-column catalog

- 9:29 PM — Tile cards + ownership editor; Pax Bolt: 4 owned / 17 needed / R1 / Partial
- 10:44 PM — Progress bars on tiles; dashboard: 129 / 2 owned / 1 completed / 127 missing
- ~11 PM — Melee Influence: 21/21 (100%), green bar, Complete
- 2:20 AM — Modal live; Melee Afflictions with R0–R5 buttons; 33 owned / 29 completed

Milestones

Application

- First complete Arcane Collection system
- First persistent ownership tracking
- First collection progress bars
- First modal-based collection management interface
- First rapid rank-entry system (R0–R5)
- First collection completion calculations

Personal

- Independently diagnosed JSX structure issues
- Independently modified UI typography
- Independently located correct component among multiple similar elements
- Fixed multiple UI issues without assistance

Product

- First external demonstration (Google Meet screen-share, clan second-in-command)
- First positive user validation — immediate comprehension without developer context
- First conversation about future public release and creator outreach strategy

Next Session Targets (Shipment B — Collection Intelligence)

- Priority 1: Clickable category cards
- Priority 2: Expandable arcane detail rows
- Priority 3: Arcane ownership editing (update → save → auto-refresh)
- Priority 4: Complete collection management workflow
- Future: Arcane sorting, missing arcane prioritization, farming planner, acquisition intelligence
